## Acknowledgements

This project is dedicated to Dr. Richard Orend of USF, who assisted with the design of the initial study and would have completed the research and analysis if he had not tragically died before this was possible. Special thanks to Dr. Michael O'Neill who took over the USF study after Dr. Orend's death and was responsible for the subsequent work up to the actual analysis of the data.

Thanks also to Robert Crenshaw of the California Council of Churches for editing the final document and to Jim Zazzera of Doorknob Graphics for graphic design work.

Additional copies of the report are available from the California Council of Churches for \$5, or may be downloaded at [www.calchurches.org](http://www.calchurches.org).

The full technical report is also available from the California Council of Churches for \$12 or also may be downloaded at no cost from [www.calchurches.org](http://www.calchurches.org).
